

Speech and Language Pathologist Job Posting

Simply Communication provides family centered speech, language, and feeding services to patients from infant to adolescents. We also provide orofacial myology services to adults and children. We are passionate about providing client centered therapy services.

We are now seeking Speech and Language Pathologists (full and a part time) with the desire to grow and develop their skills within pediatric feeding, swallowing, and myofunctional disorders. These positions require candidates who have training (or a strong desire to learn) in providing orofacial myofunctional therapy and pediatric feeding services. Candidates must have a positive “can do” attitude, be flexible and have strong communication skills.

Responsibilities:

- Diagnose and treat a variety of speech, language, oral motor, and feeding disorders
- Evaluate and treat Orofacial Myofunctional Disorders
- Conduct, interpret, and analyze standardized testing for pediatric patients
- Develop patient treatment plans based on their specific needs
- Complete required documentation of all patient encounters
- Communicate effectively with patients, parents, caregivers, and outside professionals (i.e., teachers, physicians, other providers, etc.) as needed to ensure excellent patient care
-

Qualifications:

- Current Illinois License
- Master’s Degree in Speech Language Pathology/Communicative Disorders
- Strong verbal and written communication skills
- Current ASHA Certificate of Clinical Competency (CCC)
- A recommended two years of experience providing pediatric oral motor therapy and feeding therapy with desire to learn how to identify and treat orofacial myofunctional disorders
- Exceptional organizational and multitasking skills are needed for this position
- Must pass all criminal background checks as required by the State of Illinois to be eligible to work with children and vulnerable adults
- Proficient in the use of MS Office (Word, Excel, PowerPoint etc) and willing to learn clinic’s EMR system
- Adherence to HIPAA privacy rules
